

EKCO Architectural Doors and Windows

Design, manufacture, and installation of high-performance glazing solutions

ekco
Doors & Windows

Welcome to **EKCO** Doors, Windows & Glass Extensions for Complete Living Solutions

EKCO designs, manufactures, and installs high performance glazing solutions for your home or business. We are also Scotland's exclusive retailers of industry renowned Internorm, Solarlux, Spitfire Doors, and Origin.

EKCO's subsidiary company Wolff Doors has an exclusive arrangement to supply and fit luxury Spitfire entrance doors with three different models and over 600 styles to choose from.

EKCO is one of Scotland's leading suppliers of thermally efficient timber, aluminium and aluminium clad timber window for homes and businesses across the country.

EKCO's subsidiary company, Spacekube, is leading the way with Solarlux luxury glass extensions,

canopies and wintergardens which can be supplied and installed in a fraction of the time it takes for a traditional extension...and for a fraction of the cost.

EKCO can design, supply and install your brand-new doors, windows and glass extensions, or you can choose our supply-only option which means we can deliver from our showroom in Uphall, Livingston direct to your home or business anywhere across Scotland or the north of England.

Installation throughout
Scotland & Northern England

How to contact us...

Your first step is to discuss your needs with us, we are here to help.

By telephone on 01506 857 007

By email sales@ekco.co.uk

Try before you buy...

We recommend that you visit our showroom, see our products for yourself and request a full demonstration by one of our team.

Showroom

54 West Main Street, Uphall,
West Lothian, EH52 5DW.

Opening Hours

Monday to Friday: 08:30 - 16:30.

Saturday: 09:30 - 16:30.

The EKCO design and installation process

Unsure about any technical details?

During your visit we will explain the key features of our products so that you can make an informed decision on the right ones for you. If you have employed an architect for your project we can arrange to meet them and discuss all technical details and performance specifications in depth. We also recommend sending us the details for your builder so we can discuss the important details required for the survey and install. We can also discuss the important dates and keep you informed at every step, so you know that everything is under control.

Happy to proceed?

Great! Next, we will arrange a survey and look to confirm an installation date based on the product lead times and when site will be ready. If you have employed a builder, during site survey, we will agree the best solution to prepare for installation. We can still make changes at this stage if required, but always with your approval. Once we have all the final sizes confirmed we will email you an order confirmation for approval. We will then ask you to check over all details one last time before production starts.

What's next?

Sit back and relax knowing your project is in hand and we will update you as your order progresses.

Installation

Our installers will always aim to arrive for 8am in EKCO branded vehicles and EKCO uniforms. All our installers are fully employed by EKCO.

Completion sign off

Once your new products are installed we will ask you to fully inspect and sign off as successful completion.

Bi-Fold Door Overview

EKCO offers an extensive range of complete bi-fold door systems suitable for even the most demanding home improvement projects and specifications. Each bi-fold door system has its own unique qualities and key features to suit your specific requirements. Visit our showroom for a demonstration of the different variations available.

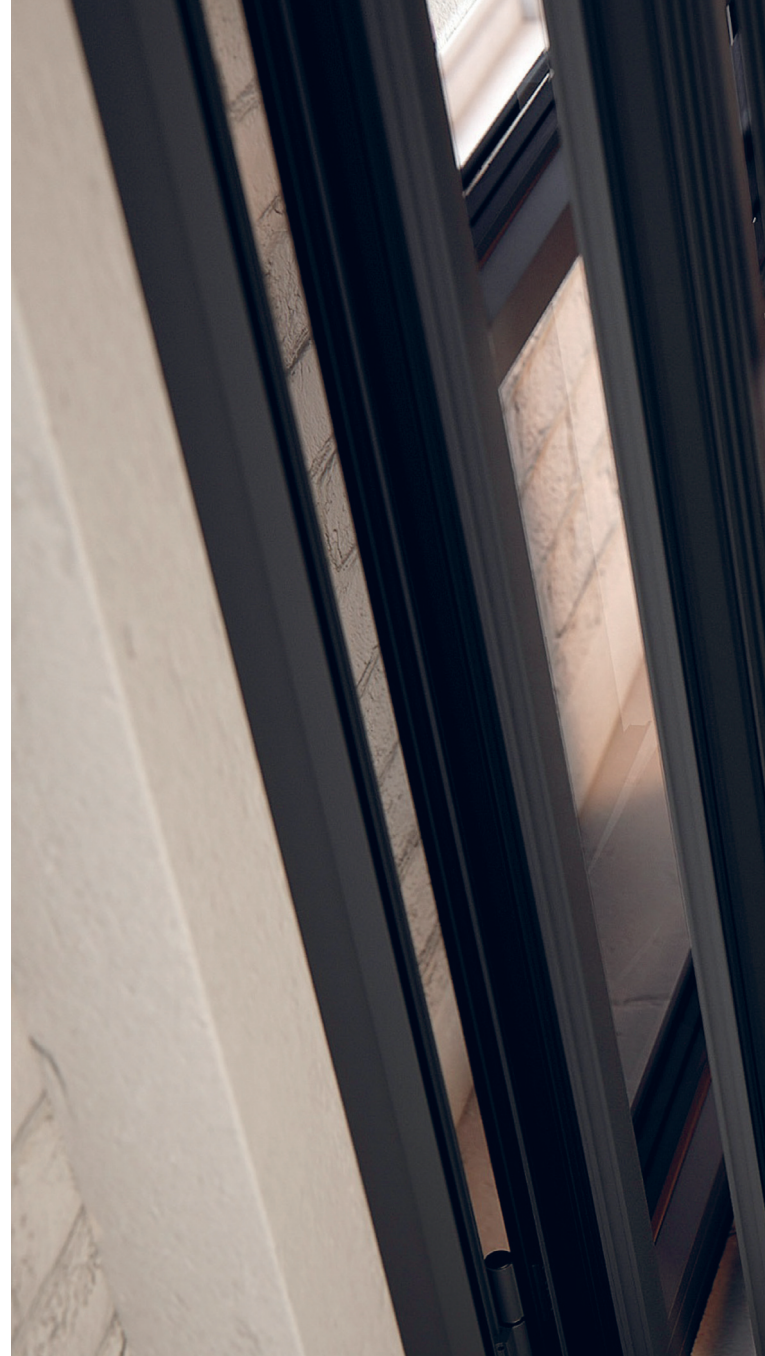

The EKCO Commitment

We are committed to delivering the highest level of expertise from start to finish. Our specialist team of designers will ensure that you receive the very best advice and recommendations on the right bi-fold doors to meet your needs and our expert team of installers are organised and equipped for even the most challenging of projects.

Choosing your Bi-Fold Door

EKCO have exclusively selected six bi-fold door systems with various specifications to suit your home or business. Here is a list of points to help you choose which specifications are right for you.

- Sightlines – Mullion size to maximise glass area
- U Values – Thermal insulation
- Glazing – Performance requirements
- Style – Configuration options
- Functionality – Ease of operation
- Hardware – Design and finish options
- Weathering – Performance tested
- Security – Standard or PAS24 tested
- Trickle Ventilation – Rate of air flow to room area
- Thresholds – Requires construction consideration
- Corner Detail – Optional on certain systems
- Weight – Supplied assembled or packed
- Warranty Period – Vary from 5 to 20 years
- Marine Finish – For extreme exposed locations.

Internorm Doors & Windows

Internorm
Windows - Doors

Why choose Internorm by EKCO?

Internorm windows and doors allow you to **create your individual living space by offering bespoke solutions tailored to your unique requirements.**

To find the ideal glazing for your project, you can choose from a wide range of colours, materials and accessories.

Internorm products also come in four distinct design styles to enhance any architectural design: **studio, home pure, home soft** and **ambiente.**

Which one will you choose?

Key Features

We understand that home architecture is as varied as the people living in it. With four different design styles to choose from, we cater for both contemporary and traditional architecture. Better yet, all of our triple glazed windows are designed to deliver unrivalled thermal, acoustic and security performance. With U-values as low as 0.62, Internorm windows are ideal for Passivhaus projects, resulting in significant energy savings.

- | | | |
|------------------------------------|---------------------------|-----------------------------------|
| ✓ Exceptional Thermal Performance. | ✓ Enhanced Security. | ✓ Innovative Technologies. |
| ✓ Superior Noise Insulation. | ✓ Bespoke Design Options. | ✓ Low Maintenance, Long Lifespan. |

Revolutionary I-Tec Innovations

To meet the ever increasing demands on design, technology, quality and comfort, Internorms' in-house product development department has created "I-Tec", a range of revolutionary, industry leading innovations for windows and doors.

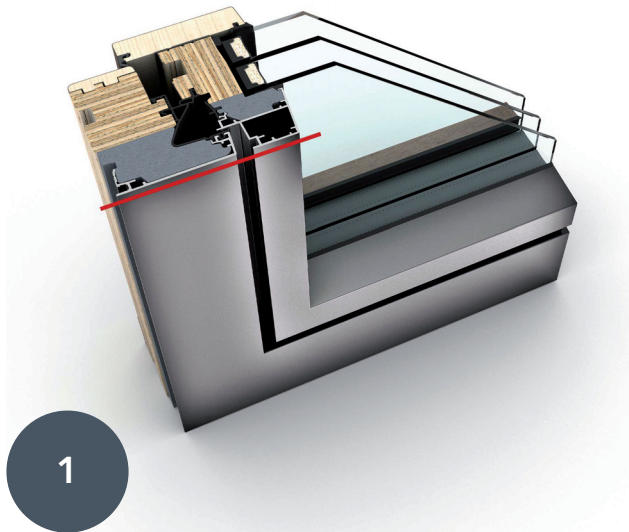

- I-tec Core.
- I-tec Glazing.
- I-tec Insulation.
- I-tec Secure.
- I-tec Shading.
- I-tec Connect.
- I-tec Open.
- I-tec Decor.

Our Timber-Aluminium Windows

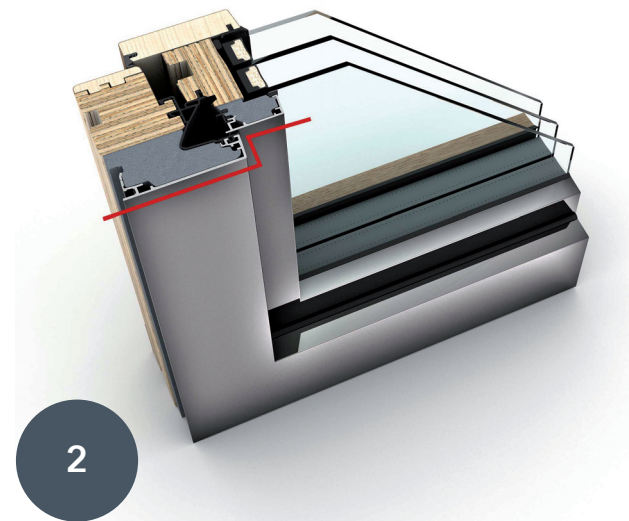

The Internorm sustainably sourced timber options offer a versatile range of composite triple glazed windows, the ultimate choice for many homeowners. Choose from real Spruce, Oak, Larch or Walnut timber finishes.

Choose from Four Different Design Styles

Studio

The studio design style is characterised by clean lines and a minimalist design. The windows become a design feature in their own right, whilst enhancing exceptional architecture.

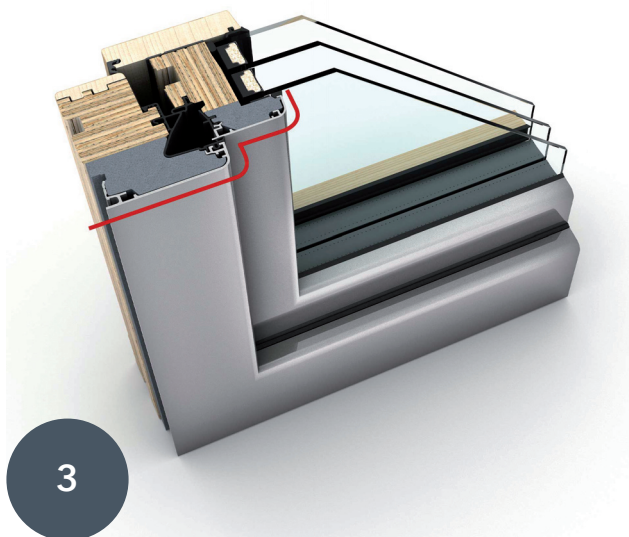

Home Pure

The modern home pure window with its square edge design perfectly blends into the unique architecture of contemporary buildings.

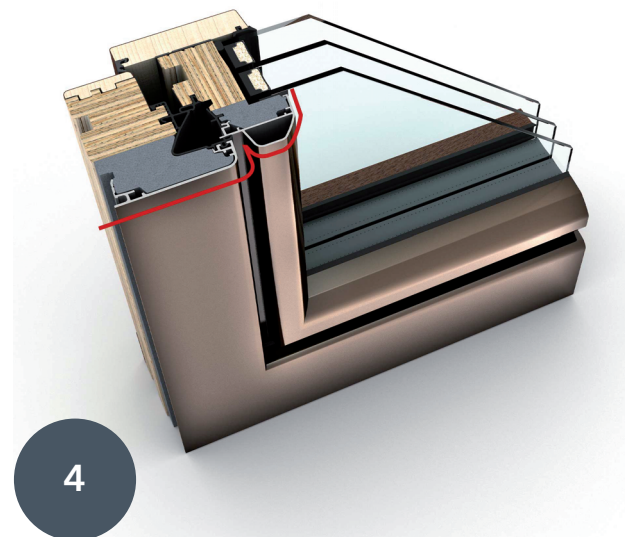

Embracing Internorm Windows offers an avenue to elevate your home notably.

Home Soft

The elegant round edge design of a home soft window creates a timeless look that can be integrated effortlessly into any design and architecture.

Ambiente

An ambiente window offers the perfect blend of traditional design and classic detailing. The round profiled edges add a special charm to any façade.

Internorm Lift & Slide Doors

Internorm's premium, triple glazed lift and slide doors offer you a high performance and long lasting solution to any sliding door needs.

Offered with triple glazing, the lift and slide doors by Internorm ensure exceptional thermal insulation with U-values as low as $0.64 \text{ W}/(\text{m}^2\text{K})$. The improved heat retention up to Passivhaus suitable standards allow you to enjoy a home and benefit from low energy systems; improving the property's carbon footprint.

The bespoke lift & slide doors are precision engineered using a collection of materials that are designed to last. You can opt for profiles that are available in Timber-Aluminium, uPVC-Aluminium as well as uPVC. We also offer the panoramic HX300 sliding doors; a profile that allows for much larger openings, thus giving you the option to make walls disappear and seamlessly connect your UK property to the surrounding nature.

Additionally, we are proud to offer our Internorm fly screens. We provide a range of fly screens and four different fabric options to complete any Internorm Timber-Aluminium or uPVC-Aluminium window or door product, so there is one for every home and every project.

Bespoke Designs

- Enjoy more light through large scale glass units.
- Available in an array of attractive colours for individual design requests.
- Benefit from better stability due to the glass fibre low threshold.
- Thermally insulated sliding glass doors with U-values as low as $0.64 \text{ W}/(\text{m}^2\text{K})$.
- Profiles can be perfectly combined with other Internorm systems.

Innovation & Performance

- Toughened glass panes prevent injuries if glass breakages occur.
- Offers exceptional comfort combined with high quality innovation and technology.
- Create an open & bright living environment.
- Option of I-tec Innovations to create a smarter and efficient home.
- Minimal tripping hazard due to the low threshold height.

Why choose Wolff Doors by EKCO?

The perfect entrance door is a combination of warmth, strength and beauty. It needs to be energy efficient to retain heat within your home and reduce energy costs. It needs to deliver the highest standards of security to keep your property and your loved ones safe from intruders. And it needs to look as beautiful in the years to come as it did the day it was installed. The Spitfire Door collection from Wolff will deliver all this and more.

S200 Door

The S-200 aluminium door collection from Spitfire is all about form and function. These sleek contemporary doors have garnered an unyielding reputation for excellence over more than a decade, boasting complete security which has satisfied customers across Europe.

Every door design within the S-200 range comes with a black thermally-broken aluminium low threshold as standard, and Winkhaus German engineered precision locking systems. With elements such as these, S-200 doors offer impeccable style and impregnable security.

S500 Door

The Spitfire S-500 range has already proven itself hugely popular across Europe, due to a combination of premium quality Schuco aluminium profiles and engineering excellence. In fact, more than 200 S-500 aluminium doors are installed each week in Germany, Austria and Switzerland.

High tech advancements and the highest quality materials allow S-500 doors to offer the very best in terms of security, as well as a sleek, thoroughly modern design. Doors can even be customised with Swarovski crystals for true elegance.

Solarlux Wintergarden

Scan the QR code
to download the
complete Spacekube
brochure.

Why choose Solarlux Wintergarden by EKCO?

A wintergarden is a thermally insulated glazed roof structure which with the addition of double or triple glazed sliding/bi-folding doors or fixed panels can extend an existing room in a living/commercial space without the requirement of an internal door between the existing and new space.

This means the glass extension can be used and enjoyed all year round thanks to its thermal-insulating and security features.

You can have a bespoke, highly efficient, thermally insulated glazed extension which suits the style of your home or commercial property and with your choice of ventilation, heating, lighting and automation will provide the perfect climate and

ambience inside the wintergarden. You can watch the changing seasons in the comfort and in the warmer months open up the space to embrace the outside.

Made with high-quality sustainable low maintenance aluminium, available in 30 RAL colours as standard or sustainable wood.

Key Features

- ✓ Climate buffer zone
- ✓ Experience all four seasons
- ✓ Boost the value of your property
- ✓ Individual project solutions
- ✓ Wide range of roof shapes.
- ✓ Flexible opening options

Solarlux Cero II, III and IV

Scan the QR code
to download the
complete Spacekub
brochure.

Why choose Solarlux Cero II Glass Panels by EKCO?

The stunning bespoke thermally insulated aluminium profile system cero sliding door benefits from 40 years of Solarlux experience in customised glass solutions. Thus guaranteeing precision, innovative technical details and a discerning design - exclusively 'made in Germany'. It offers superb design freedom with its impressive transparency via the expansive glass panels which opens up rooms to make the line between the inside and out dissolve away.

With ultra-slim 34 mm profile sight lines, the individual sliding elements can reach up to 6 metres in height and make up a total area of 15 m² (cero III). All in all, the system is made of 98% glass providing a huge 98% daylight transparency. Spaces are flooded with light providing a feeling of airiness and grandeur.

Key Features

- ✓ A mere 34mm narrow profile.
- ✓ High-quality aluminium in your choice of colour, 30 RAL colours as standard.
- ✓ Extra large toughened glass panels up to 12 m².
- ✓ Intelligent drainage, tested and certified for wind load and air/driving rain.
- ✓ Versatile ground plans. Multi-track and various corner situations can be executed.
- ✓ Easy glide stainless steel carriages/rails for long-term safe running properties.
- ✓ Motorisation options inc. electro-mechanical locking/unlocking and integrated insect protection.

Cero III

Triple glazed option achieves U_w values of around 0.8W/m²k, suitable for passive homes depending on the size, glazing and configuration choices. Extremely large toughened glass panels up to 15 m².

Cero IV

Also triple glazed, it has all the great features of cero II and cero III with the additional innovation of a structural glazing effect that makes the forend almost completely invisible offering even greater transparency levels than ever before. The top and bottom sight lines on the panel profile are only 15 mm wide each and the vertical only 2 mm! In addition, the cero IV also has a frame that can be set flush into the ceiling, just like all other cero systems. This allows the frame and profiles to disappear from view almost completely so the generous glass area can take centre stage.

Solarlux Bi-fold Doors

Why choose Solarlux Bi-fold Doors by EKCO?

Aluminium bi-fold doors are precision-engineered with multiple frames hinged together which fold up, much like a concertina, thus allowing a wider opening than traditional doors. Our frames are either made using FSC certified sustainable softwood clad with aluminium, or simply aluminium on its own.

But why aluminium? Because it is one of the most eco-friendly materials on Earth which can be recycled indefinitely without losing any of its original properties. Combined with double or triple-glazing our bi-fold doors provide excellent insulation, energy efficiency and security for both you, your family, and your home.

Highline Bi-fold Door

The Highline bi-folding door system, with a building depth of 84 mm, can accommodate panels up to 1.1 meters wide and 3.5 meters high. It features a continuous, slim sightline of 99 mm at the panel joint, achieved through the innovative bionicTURTLE®. This multi-functional break profile integrates several technical details, allowing for slim profiles even with large and heavy panels. Additionally, it incorporates the locking mechanism and ensures excellent insulation.

The Highline bi-folding door is pas 24:2016 certificated

For new builds, windows and doors must comply with DOC Q Building regulations, ensuring they meet the PAS 24 security standard. PAS 24, or "Publicly Available Specification 24," is a British standard that provides a pass/fail security benchmark for doors and windows, with testing by UKAS-accredited bodies.

The Highline system is PAS 24:2016 certified and Secured by Design (SBD) accredited, indicating high security standards endorsed by the UK police. Always choose a product that meets these standards for maximum safety.

Megaline Bi-fold Door

The Megaline bi-folding door is engineered to deliver outstanding thermal insulation, making it an ideal choice for settings that demand extra-tall or wide panels. This feature-rich door is especially suited for commercial establishments like shops, restaurants, and public buildings, as well as remarkable private residences that aspire to make a statement with its exceptional design features.

Boasting a maximum panel height of 4.50 m (or a panel width of up to 1.50 m). It can effortlessly create vast glass surfaces while ensuring ease of operation and mobility. The specialized stainless steel tracks are cleverly designed to accommodate unguided carriages and can be paired with various floor tracks, including accessible ones that adhere to DIN 18040 standards.

Moreover, multiple sets of system hinges can be added above each other, depending on the height of the system, ensuring maximum panel stability, even when exposed to high wind loads, as the panels can weigh up to 150 kg each. Additional structural profiles can also be added in the panel joint areas, making it an ideal choice for highly demanding structural locations.

Ecoline Bi-fold Door

The Ecoline bi-folding door system, with a building depth of 67 mm, accommodates panels up to 1 meter wide and 3 meters high. It features a continuous, slim sightline of 99 mm at the panel joint, achieved through the innovative bionicTURTLE®. This multi-functional break profile combines various technical elements, maintaining slim profiles even with large, heavy panels. Additionally, it incorporates the locking mechanism and ensures excellent insulation.

For new builds, windows and doors must comply with DOC Q Building regulations, ensuring they meet the PAS 24 security standard. PAS 24, or “Publicly Available Specification 24,” is a British standard that provides a pass/fail security benchmark for doors and windows, with testing by UKAS-accredited bodies.

The Highline system is PAS 24:2016 certified and Secured by Design (SBD) accredited, indicating high security standards endorsed by the UK police. Always choose a product that meets these standards for maximum safety.

Why choose EKCO Glass Structures?

SpaceKube, a division of EKCO, is creating solutions for extra space for homes and businesses with Solarlux luxury glass extensions, glass canopies and wintergardens so you can enjoy the Scottish outdoors from the comfort of your home...all year round.

There are many design options and accessories to choose from here at SpaceKube by EKCO, meaning that you'll never need to compromise on style or quality.

Spacekube Bold

Shadow play with a fresh breeze - with Spacekube Bold, Spacekube offers a special kind of patio roof "Made in Germany". Simply regulate your individual bioclimate yourself via the louvres' angle of opening. Optional sensors enable automatic weather-dependent alignment of the louvres, enabling you to enjoy your stay on the patio well protected. The weather protection product can be designed individually as your patio sky with extras such as integrated vertical sun protection or LED lighting on louvres and frames.

Spacekube Zero

Terrazza Pure, the new glass patio roof from Spacekube, relies on a modern cubic style of roof combined with innovative design. Classic patio roofs are designed angled so that rainwater can drain off. With Terrazza Pure, the pitch is integrated into the frame construction and is therefore invisible from the outside. The result: clear, cubic design combined with reliable drainage - the perfect solution for anyone who wants to enjoy lots of natural light on their patio and appreciates reliable, modern designed weather protection at the same time.

Key Features

- ✓ All-year-round patio protection.
- ✓ Modern, cubic design.
- ✓ Unique glass support system.
- ✓ High quality colour LED lighting strips and attractive decorative strips.
- ✓ Easy to extend into a Spacekube Glasoase®.
- ✓ More than 200 frame colours.

Why choose EKCO Bi-fold Doors?

We now offer a complete home improvements portfolio, yet our core values remain the same - to deliver and install high-performance products to meet the demands of homeowners, builders and architects throughout Edinburgh, Lothians, Fife and across Scotland and the North of England.

Our aluminium bi-fold, sliding doors and windows are manufactured to the highest specifications. They offer the ultimate thermal efficiency to keep your home warm and energy efficiency to keep your fuel bills low - even during the worst Scottish winters.

EB90 Bi-fold Door

There are so many reasons to incorporate a bi-fold door into your home. Not only will you improve the view from your kitchen or family room, you'll also make those internal spaces a lighter, brighter and more enjoyable place to be.

By softening the boundary between your home and outdoor space, you'll also make your abode a more flexible place for hosting. In fact, many people who fit bi-fold doors say that they find themselves spending significantly more time outdoors once they have enjoyed the added convenience of their new fitting.

Your home deserves the best bi-fold doors, and that's exactly what you get with the EB90 bi-fold door from EKCO Architectural Doors and Windows.

Key Features

- ✓ 90mm Sightline.
- ✓ U-Value - Up to 0.8 W/m²k.
- ✓ Unique 8-point locking system with 3-Star Diamond cylinder and PAS 24 as standard.
- ✓ Fully customisable.
- ✓ Up to 6,000mm in width and 2,500mm high.

Elevate your home with EKCO's premier offerings - the EB160 and EB114 bi-fold doors. These doors combine security and style, making a statement every time you step in.

Seamlessly merging windows and doors, bi-fold doors fill your space with natural light and connect indoors with outdoors, creating an inviting ambience.

The EB160 boasts a 160mm sightline, while the EB114 features a 140mm sightline. Both exemplify craftsmanship and innovation. Discover the perfect blend of aesthetics and functionality as you transform your living spaces with our bi-fold doors. Explore our collection today to redefine your home's appeal.

Doors that glide effortlessly...

EB114 Bi-fold Door

- ✓ Sash Totals: 1-18.

Installation throughout
Scotland & Northern England

EB160 Bi-fold Door

Key Features EB114 & EB160

- ✓ Sash Width: Minimum 400mm (odd) / 700mm (even). Maximum 1200mm
- ✓ Threshold: Weathered 75mm (50mm and 25mm cill). Non-Weathered 45mm.
- ✓ Gaskets: Colour coded and finger safe
- ✓ Lead Time: 1-2 weeks standard colours / 3-4 weeks non standard.
- ✓ Finish Optional: Marine Finish

A modern take on the traditional patio door, the Origin Patio Slider ES29, ES77 and ES44 are the perfect fit for any home.

Made entirely bespoke, there are three sightline options available. The ES29 is the smaller of the three, with sightlines of just 29mm, maximising glass and the level of natural light which can flood in. With 44mm and 77mm sightlines, the Patio Slider still possesses some of the slimmest sightlines whilst providing a more traditional style of patio system with an injection of effortless elegance.

Your home is one-of-a-kind, and we believe your doors should enhance their individuality while meeting your specific requirements. That's why our sliding doors are custom-made to suit your needs.

A size to suit
your needs...

Why choose EKCO Windows?

Our Aluminium Window Collection includes a variety of elegant options suitable for both modern and traditional homes. With 150 RAL colours to choose from, these windows can be customised to complement any property, whether a new build, period-style cottage, or existing structure.

The collection features two systems: the EW-70 and EW-80. The EW-70 has an ultra-slim 65mm profile, maximising natural light and panoramic views, while the EW-80 offers a sleek internal flush casement design. Both systems provide exceptional finishes, durability, and low maintenance, with the EW-80 offering more configurations, larger sizes, and greater customisation options.

EW-70 Windows

EKCO's Origin Slimline Window (EW-70) is the latest innovation in window design, offering a combination of strength and aesthetic appeal. As the slimmest window in Origin's line up, it is engineered with sleek aluminium frames that not only provide a modern and elegant look but also ensure durability and robustness. The EW-70 model stands out in the market for its ability to maximise natural light while maintaining superior structural integrity, making it an excellent choice for those seeking both style and performance in their window installations. See the key features below.

EW-80 Windows

Origin by EKCO Windows are custom-made to your specifications. The EW-80 system includes various configurations like fixed or sashed casements, bays, gables, and French windows.

Made from lightweight, premium-grade aluminium, they resist warping and corrosion and require minimal maintenance—just an occasional wipe with soapy water. Unlike timber or uPVC, aluminium is more durable, environmentally friendly, and can increase your property's value. See the key features below.

Why EKCO Heritage External Doors? Artistic, Industrial, Beautiful

Artistic, industrial, beautiful; these are just some of the words used to describe the new range of artisan created Heritage external doors from EKCO.

Whether you choose our custom-designed, slim-profile steel frames, combined with either large glass panes or multiple small glass panes, our Heritage range of external doors will exude a minimal, yet timeless, look designed to suit any home or commercial property. This means they are the perfect choice whether fitted to a bespoke architecturally designed property, extension for a period town house, country escape, converted warehouse or refurbished steading. Explore the EKCO Heritage external door collection and imagine how they would look in your home.

Heritage Bi-Fold Doors

Bi-fold doors remove the barrier between your indoor living area and outdoor space allow for an uninterrupted flow from one zone to another. Our new range of Heritage bi-fold doors offer cutting-edge design with ultra slim steel frames and your choice of glass panes.

Heritage Sliding Doors

Our Heritage sliding doors are available in two sliding door systems and four different slim sightlines designed to house the largest glass panes on the market for uninterrupted views of your outdoor area.

Heritage French Doors

A timeless classic, with all the benefits of our cutting-edge technology and the perfect choice to add a contemporary twist to a period country home. Available with large or multiple smaller glass panes.

Heritage External Patio Door Benefits at a glance:

- Cutting edge design, custom-made with ultra slim sightlines.
- Choose from large glass panes for an uninterrupted view of your outdoor space or smaller glass panes for a more contemporary, industrial look.
- Made from premium quality aluminium, the most sustainable building material on the planet.
- Over 150 RAL colours to choose from.
- Beautiful yet secure - PAS 24 compliant and Secured by Design accredited.
- Unrivalled thermal performance to keep your home warm in winter and cool in summer.
- Low maintenance and guaranteed for up to 20 years.

Heritage Front Door

We also offer a range of luxury Heritage front doors which are custom-designed and engineered using premium-grade aluminium with all the safety, security and thermal benefits of the other external doors in the EKCO range.

— EKCO Heritage Internal Doors  EKCO —

Why EKCO Heritage Internal Doors?

EKCO's new range of Heritage aluminium internal doors are the perfect solution for dividing your living space into zones without creating obtrusive barriers.

Think Art Deco with a nod to Japanese minimalism which emphasises simplicity and functionality while eliminating unnecessary clutter. Our Heritage internal doors are beautifully understated yet engineered to allow the maximum amount of light to flow between each room while still allowing a degree of privacy. Explore our range and discover the right EKCO Heritage aluminium internal door system for your home or commercial property.

Heritage Fixed Internal Slimline Glazing

EKCO's Heritage fixed internal slimline glazing screens create the perfect room divider. The versatility of our screens means they can be used in a variety of locations including partitions for meeting rooms in commercial properties. Their minimal design is especially suited to industrial style premises such as converted warehouses or rustic steadings.

Heritage Slimline Hinged Doors

As with our other internal doors, Heritage aluminium slimline classic hinged doors are custom-built to your own bespoke requirements. Choose from single or double doors in steel-effect aluminium.

Heritage Internal Bi-Fold Doors

As with external bi-fold doors, our internal bi-folds can be opened fully to remove the barrier between rooms. For example, you can fit them between your living and cooking areas but may wish to open them when entertaining guests to create a larger open area.

Heritage Sliding Pocket Doors

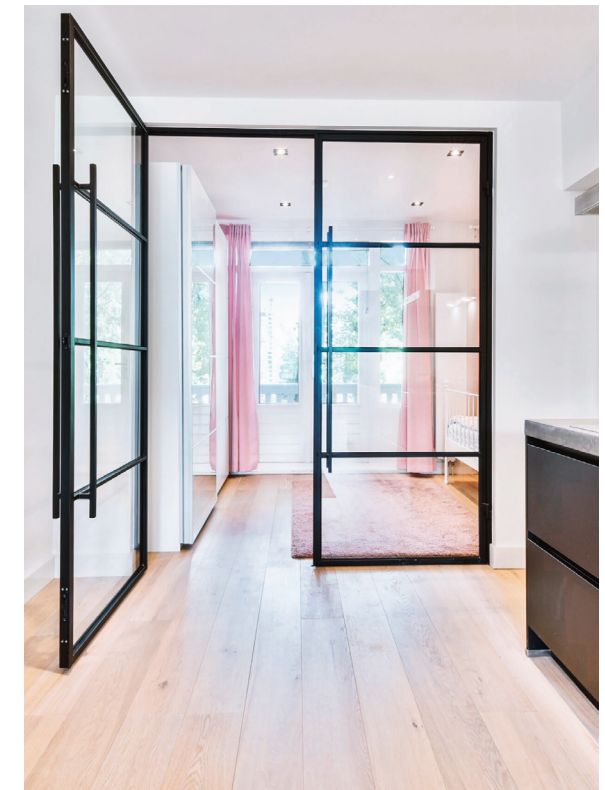

Sliding pocket doors are interior doors which conveniently slide into a wall cavity. This is the perfect solution when the dimensions of the room don't allow for hinged doors.

Heritage Slimline Internal Pivot Doors

Heritage internal pivot doors, like our other doors, are custom-made using premium grade aluminium in bespoke sizes. The design allows for an ultra-slim frame and one large glass pane which can be either clear, to allow for the maximum amount of natural light, or frosted which is perfect for adding to an ensuite shower room.

Heritage Slimline Internal Sliding Doors

Our internal slimline sliding doors are an excellent solution when limited space would mean that hinged doors would be difficult to open. Heritage internal sliding doors are also custom-built from premium-grade aluminium and the overall aesthetic is one of Art Deco meets Japanese minimalism. This makes them the perfect choice for any style of home or commercial property.
